Hi

My opinion on the Microsoft Settlement:

This is a small person in a big world speaking out against a wrong that will(or could) one day bring the world as a whole to its knees(read FBI security report). In that world you and your country will be controlled, as are those who are in control of you. Microsoft is gaining power everyday, one day, NO ONE will be able to do what NEEDS to be done. Before it's too late, stop them! Don't settle until you and your government are in control. If you don't do it now, later may be too late. If you think I'm wrong, try surfing the internet with the "Options" that are out there. "Opera" is a great browser available for "all" systems to use, but "many" sites don't load... "Microsoft Enterprise" server run sites. So you get forced back to "Internet Explorer". So what, I can hear you say, well one day, if you "piss-off" "Bill" maybe your internet tax returns will all go missing... what are you going to do then? Say bad Bill? Naughty boy! Think it can't happen, ask "Steve Jobs" he'll tell you what "Bill" can do for you. "Make Our Browser Default Or You Don't Get Office." What could he do? Nothing! Now it's default on all Apple computers. As far as I can see, BILL GATES paid "someone" off BIG TIME to make this all go away, man it must be great to be the RICHEST MAN IN THE WORLD you can BUY your way out of ANYTHING! What did he do buy the election (or fix it, it was WINDOWS machines counting those ballots... right)? The Democrats lost, so the bosses would get changed, so the case would go away. LAND OF THE FREE alright... anything can happen for the right price \$\$\$\$.

MICROSOFT SUCKS!!!!

Thank you for your time(although I know I've wasted mine)

Brad Harrison(Apple user)
